Trust 3rd Eye Security Solutions Private Limited

The "Anti-Theft Alarm" feature is your device's first line of defense against theft and unauthorized access. With this feature, your mobile device becomes more secure than ever before.

- 1. Find My Phone** After the consumer's phone is stolen, if the thief tries to enter the PIN, pattern, or finger password in the mobile phone more than three times, then the mobile phone will be completely locked. Along with this, if the thief wants to turn off flight mode or location by scrolling down the mobile phone, it will not be possible because the entire scroll screen will be locked. Along with the mobile being locked,
- 2. Photo Capture Rear & Front Camera** The front and back side photo and live location of the thief will be sent to the consumer's emergency number.
 - A.** A sound will start coming from the consumer's phone that this mobile is stolen. Please call the number given on the screen. In this condition, the thief cannot switch off the mobile nor can increase or decrease the volume.
 - B.** The live location emergency number from the consumer's phone, which was given by the consumer while installing the application, will be sent to the number through SMS, which will make it easier to catch the thief.
 - C.** Even if the data and location of the consumer's mobile is switched off, the location of the network tower will still be sent in latitude and altitude.
 - D.** Even if the thief can remove the SIM of the consumer's mobile, the last location will be sent to the consumer's mobile without the need for internet.

Trust 3rd Eye Security Solutions Private Limited

- E. If the thief inserts a new SIM in the consumer's mobile, then after inserting the SIM, the new number, the live location of the thief or the location of the network tower will again be sent to the emergency number of the consumer. So that it becomes easier to catch the thief from that number and location.
- F. If the consumer's emergency number is not working, then in that condition the photo of the thief, live location etc. can also be provided to the consumer from the company's website.

3. Sim Card Lock Whenever a thief takes out the SIM from the consumer's mobile phone, as soon as the tray is out, the Trust Third Eye application will immediately start working and will click photos from the front and back cameras as well as lock the entire phone and sound the alarm. Will begin. If the thief inserts another SIM in the consumer's mobile, the new SIM number will be sent to the consumer's alternate number through message. The thief cannot activate a new SIM in the consumer's phone unless permission is given from the admin power of the trust third eye .

4. Mobile stolen from pocket in a crowded Area If the consumer goes to a crowded area and his mobile phone gets stolen in that crowd, and then the consumer will have to send an SMS to his mobile phone

Trust 3rd Eye Security Solutions Private Limited

from the mobile phone of anyone in that crowd and type it. Lost my phone As soon as he sends this message from any number to his stolen mobile number, immediately all the functions mentioned above will start working again, so that the consumer, after hearing the siren of the mobile in that crowded area, will be able to alert the thief. By listening to the sound of the siren, the thief can easily be caught in the crowd.

- 5. Don't touch my phone** If a consumer keeps his mobile phone on the table and a lot of customers come near him, then any customer keeps his phone in his pocket and goes away. In this condition, the consumer will have to click on an option of Don't Touch My Phone. After that the consumer can leave your mobile free After that, if any thief moves the mobile even slightly, then all the above mentioned functions will start again and the mobile can be brought back to normal condition only through the pass code, there will be no other way.
- 6. Lock my phone** If a friend of the consumer's mobile phone is taken and tries to go into his privacy and check his photo gallery, SMS, WhatsApp etc. then in that condition the consumer will have to send a message to his mobile phone from any number and type Lock My Phone will have to be done, whose mobile will be locked and will not be able to be turned on until he enters the pass code of the trust third eye mobile application. At that time, the password of the mobile phone will not work.
- 7. Women Safty** Women Safety Trust Third Eye has given an excellent function for the safety of women. Whenever a woman goes out of

Trust 3rd Eye Security Solutions Private Limited

the house and she feels that some suspicious people are going to attack her honor, in that condition the woman should check her mobile thrice. The key to switch off and on is to be pressed. As soon as the press key is pressed three times towards those suspicious people, the photo of those suspicious people will be clicked immediately from the front and back cameras and at the same time a call will be made to the alternate i.e. emergency number and the live location of the woman will be sent to the alternate number. But it will be sent so that the family members can save the woman from the police and themselves.

- 8. Pocket Lock** Pocket Lock: If the consumer keeps this function started in his mobile and he also goes to a crowded area and someone tries to steal his mobile from his pocket and as soon as he takes the mobile out of the pocket, the mobile will be locked and a siren will be issued. And all the above mentioned functions will start again.
- 9. Track Your Children** In view of the continuously increasing kidnapping, Trust Third Eye application has given the option of Track My Children for the safety of children, so that parents sitting at home can keep track of their children. You can trace the children, where did they go at any time, where did they stay and what is their live location. Along with this, the option of **GEO fencing** has also been given by the company in which you will create a route for your children if they If your children go out of the circle or through that route, foreign parents will get a notification so that you can contact your children directly.
- 10. Child Activity** As it is seen, with the gradual progress in technology, it has become a compulsion for the parents to give mobile phones to their children after the lockdown, but it is clearly having a negative impact on the children. It turns out that children buy mobile phones in the name of studies but do not use them properly. They spend most of their time on social media platforms as well as in gaming,

Trust 3rd Eye Security Solutions Private Limited

the result of which at the end of the year is very bad. Considering all this, Trust Third Eye has given an excellent function, parents sitting in any corner of the world can check their children's mobile at any time and know which game they have played and what in the mobile through browser, social media platform etc. Parents can check for themselves what was seen so that there will be fear in the hearts of children and parents can keep an eye on their children first.

11. Controll Speed Limits As it can be seen, today's youth have become very fond of riding, due to which they perform stunts on the road with both cars and bikes. In such a situation, they forget that there is a whole family behind them, whom they leave in the morning and wait till the evening. Today's youth consider it their pride to constantly increase the speed and lose their lives in accidents in the meantime. Trust Third Eye Application has given a new feature in which parents, while installing the application in their children's mobile, will put a speed limit in a column whenever their children go out of the house in car/motorcycle and the speed is above the speed given to them by the parents. When we go, a notification message will reach the foreign parents in which it will be clearly written that your child is crossing the speed given by you. In this condition, our aim of controlling accidents will be achieved.

12. Mobile Phone Alarte For Speed Controll With this future of Trust Third Eye, the person driving can completely control his speed. If the person exceeds his speed while driving, then in that condition the parents will get the notification as well as the information on the person's mobile. The phone will start making a loud long beep which will be an alert beep. In which there will be a loud beep to control the speed, it will keep sounding until the speed is controlled.

13. Antivirus& Ramp Booster Trust Third Eye has also provided the features of antivirus booster for its consumers, such as it is seen that due to continuous use of mobile, temporary files are created inside

Trust 3rd Eye Security Solutions Private Limited

the mobile and the ramp is also used a lot. In this condition, the consumer needs antivirus. Start Ramp Booster so that this booster will delete unwanted videos, heavy files, temporary files etc. and will help you in running your mobile smoothly.

14. Backup Contacts & Message Trust Third Eye has given another great feature to its consumers, if the consumer's phone is broken or damaged, in that condition the consumer can take full backup from his Google account but cannot take backup of text messages and contact numbers in this condition. In this future, Trust Third Eye has also provided backup of SMS and contact numbers for the consumers on single click.

15. USB Insert & USB Eject

Trust in USB Insert Future Third Eye has given the best future for its consumers that if a thief tries to crack the password of the consumer's stolen mobile, laptop or computer, as soon as the USB Inserts the foreign mobile in the mobile, it will be locked and all the above mentioned features along with the siren will start again and a message will be sent to the alternate number along with the shop's live location or network location and the name of the shop. Also, after the USB is inserted, the hardware will be crushed by leaving viruses in that laptop/computer etc.

Along with this, in case the USB is rejected from the consumer's mobile, the mobile will be locked and all the above mentioned functions will start again.

16. Charging Remove Charging Remove Trust Third Eye has also provided a feature that if the consumer leaves his phone charging at some place and a thief comes and tries to steal it, then as soon as he removes the mobile from the charger, the mobile will lock. This will be done and all the above features will start again. Along with this,

Trust 3rd Eye Security Solutions Private Limited

when the mobile charge is full, a beep will sound which will indicate that your mobile has been fully charged.

17. Interested video on social media platforms This feature has been specially prepared for children as it is seen that due to lack of good guidance, children's future gets spoiled, they think that something else is happening and something else happens due to this, Trust Third for children. I have created this feature. While installing the mobile application, children or parents have to click on the interested video. For example, the child wants to become a doctor, engineer, IPS, IS etc. As soon as you click on it, all the unwanted videos will be removed from your social media platform and the interesting video will be shown to your child so that Children should develop the passion to study and at the same time, there and their parents' dreams can also be fulfilled.

18. Remotely Factory Reset

Remote wipe is a security feature that allows a network administrator or device owner to send a command that remotely deletes data from a computing device. It's primarily used to erase data on a device that has been lost or stolen, so the data won't be compromised if it falls into the wrong hands.

19. Doesn't Delete the AAP Delete app is as if you would delete it on your Mobile. This dialog will show up for any app you downloaded from the app store.

20. Water Ejector Future has been given the name of Water Ejector for the consumers because if water gets into the consumer's mobile, then this feature will be left on after starting it manually. As soon as Future starts, the mobile will vibrate for 60 seconds and after turning on the flashlight, after this, an attempt will be made to clean the mobile by reaching the heat on the motherboard.
