Website : www.ezeonsoft.com, Email : hr@ezeonsoft.com

Regarding to proposal of Data management app and admin as requirement.

Note: If you are agree with below terms of services and want to start your app development then revert this email as "I agree with app deals".

Scope of Work:

At Back end (Database level)

- 1) One User/Subscriber Master Table will be required where in his Category(Diamond/Gold/Silver/Bronze/Iron) ,Validity Period (it will be verified at the time of Login at App end) etc will be stored.

- 2) One Master Table will be required which will hold the details of Subscriber on a primary key of User ID.

- 3) One Data Table will be there where user can input his data .

- 4) The data of each user can be in approx. 10 input (in numeric) & 1 String field .

- 5) Data will be stored in Table with User ID & Data Date.

At Front end (app end)

- Any User who is a valid subscriber or having Access of App (Through Secured Credentials) can do following 2 things.

- 1) He can enter his data for a specific date.

- 2) He can view Report for all applicable User's Data (in a tabular form) as per his category.

All Standard valid checks are also require to put at the time of data Entry/Login etc.

Sample Format (downloadable PDF as well as on Screen View) are enclosed separately
